PRODUCT	LEAK TYPE	VAPORS	HEALTH HAZARDS
Hazardous Liquids (such as gasoline, kerosene, and diesel)	Liquid	Gasoline produces flammable vapors. Diesel and Kerosene liquids are combustible. Vapors will be heavier than air, will disperse with wind direction along the ground and collect low or confined areas. Vapors may travel to an ignition source and flash back to source of leak.	Inhalation may result in headache, nausea, blurred vision, weakness, exhaustion, dizziness, slurred speech, confusion, vomiting, diarrhea, and convulsion. May cause eye, nose, throat and skin irritation, dermatitis.
